_Requirements:_

The report should be included in your Git repository as reports/submission_02.pdf. It should include:

- A tour of your UI, with screenshots. Explain what each of the screens is for, and the transitions between screens.
- A description of what each startup founder worked on. We expect that each startup founder is responsible for the UI of at least one major widget on the webpage.
    - A "widget" is a major HTML element of the application. For Facebook, a status update, the left sidebar, the top navigational bar, and the notifications menu are all "widgets".
    - We are going to check your repository's Git history to verify that your report is accurate.
    - It is not acceptable for a startup founder to just write the report; everyone must "get their hands dirty" with HTML/CSS.
- 15% Contains a clear, understandable tour of your product's UI, using screenshots of your mockups
- 15% Contains a clear explanation of what each startup founder contributed to the submission
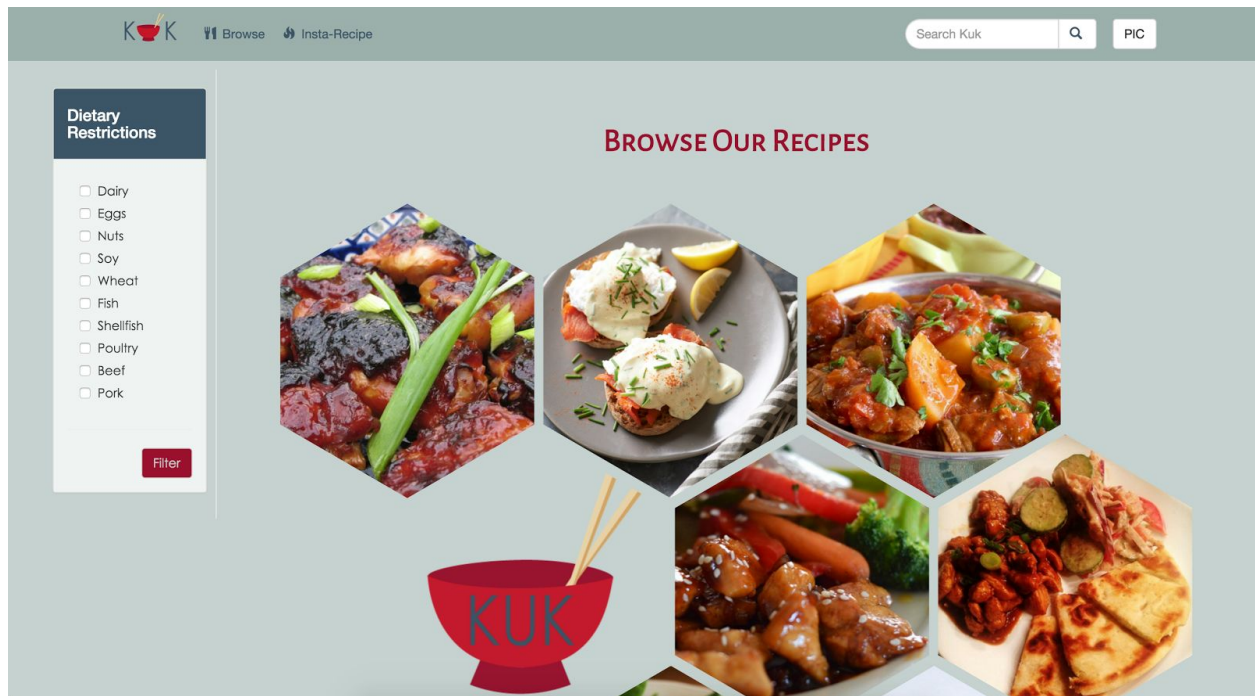

Screen 01: The Home Page (Stephanie)

The launch page for the site, where users are directed after navigating to our site. Allows the user to log in, sign up, and search for a recipe.
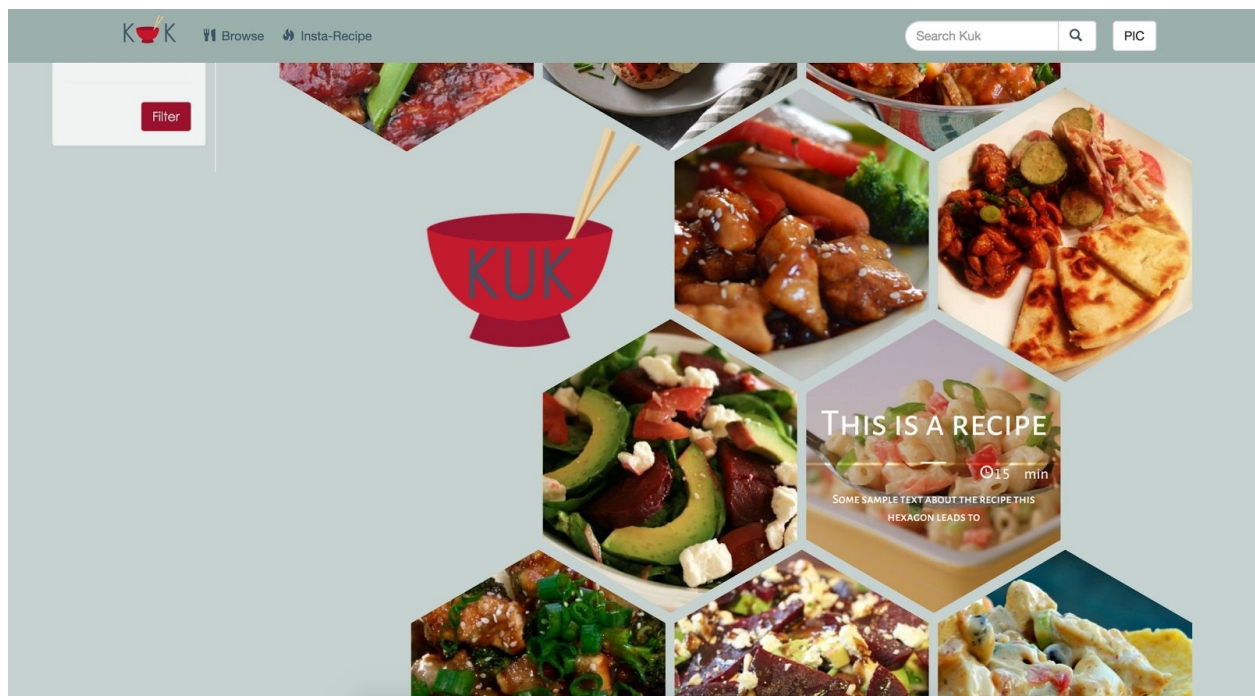

Screen 02: The Browse Page (Farida)
The first page that a user sees after searching for a recipe.

As you hover over the recipes, the name, a short description, and prep time appears.
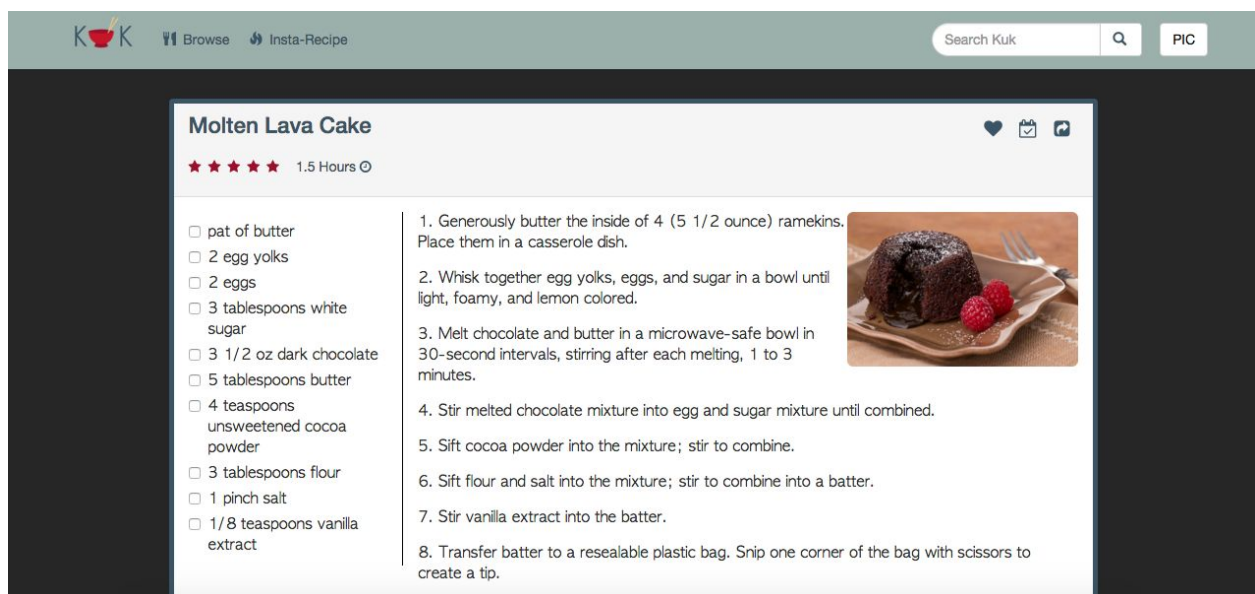

Screen 03: The Insta Page (Jen)
The page that a user sees when they want to input ingredients and get a recipe that matches what they have. Can be accessed from the navbar (which is shown on all pages except home/launch)

Screen 04: The Recipe Page (Emma)
The page displaying a sample recipe. Users can favorite the recipe, add it to their calendar, or send it to a friend.

Background here is grey because we want to turn the background opaque when the user clicks on a recipe. (Same effect as clicking on a photo on the CSC326 course page):

Screen 05: The Planning Page (Zainab)
The page with the calendar containing what the user has planned out for the upcoming week. Can be accessed through the recipe page (calendar icon), or the dropdown on the navbar.

Planning Page

Previous week   Edit this week's menu   Next week

Meals	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Breakfast	Scrambled tofu	Oatmeal with fruit	Eggs and bacon	Banana bread	Smoothie and bagel	Pb&j sandwich	Yogurt and fruit
Lunch	Meatloaf	Lasagna	Fried Rice	Roast Beef	Garden Burgers	Thai curry	Meatballs
Dinner	Chicken biryani	Pumpkin ravioli	Midnight breakfast	Smoked salmon	Beef chilli	Pineapple Fried Rice	Sushi
Snack	Homemade granola	Cheese & crackers	Fruit compote	Nuts	Mug cake	Frozen yogurt	Banana smoothie

Screen 06: The Favorites Page (Karen)
The page with all of the user's saved/favorited recipes. The recipes can be sorted by cuisine, calories, and more. Can be accessed through the recipe page (heart icon) or the dropdown on the navbar.

Screen 07: The Profile Page (Eleanor)
The profile page, where users see their upcoming planned meals and dictate their dietary preferences (ex Halal, vegan, vegetarian, gluten-free, etc). Can be accessed through the dropdown on the navbar.
